Company Overview

- Blue Ocean Creatives is a digital transformation firm specializing in ERP and management system implementations for retail, hospitality, F&B, and service businesses. With extensive experience in restaurant automation, bakery management, and multi-branch solutions, our systems are designed to eliminate leakages, prevent theft, and give owners real-time visibility into their operations.

Technical Proposal

1. Ordering & Payment (ቦኖ / ብር መስጠት Module)

- Waiter logins via tablet/mobile for order placement.
- Payment handling: cash, bank transfer (screenshot upload), or mixed.
- End-of-shift reconciliation: waiters must balance cash + bank screenshots; pending balances are held as **credit**.
- Amharic-enabled Ordering UI and Kitchen UI.
- Credit sales available for registered customers (tracked by date, waiter, and customer).

2. Kitchen & Production Module

- Recipe definition for all menu items with wastage % tracking.
- Production entry option for pastry: kitchen staff can log “X + Y ingredients = Z product.”
- Admin cross-checks **ideal recipe balance vs. actual production**.
- Alerts for abnormal wastage % and low stock.
- Two-store tracking: **Main Storage → Production Store**.
- Real-time stock balance (raw and finished goods).

3. Butchery & Raw Material Handling

- Direct butcher sales (weighed meat sales linked with cashiers).
- Integration with supplier purchases (livestock/meat suppliers).
- Wastage & cutting loss monitoring.
- Dual store handling: **Butcher Store & Restaurant Storage**.

4. Finance & Admin Module

- Supplier relationship tracking with credit/cash purchase history.
- Expense entry (cash or bank).
- Bank balance + cash-to-bank reconciliation.
- Financial Reports: Profit/Loss, Cash vs. Bank Sales, Outstanding Credits.
- Tracking of utensils, glasses, spoons, with damage/loss reporting.
- **Multi-branch logins** for centralized visibility.

5. Reports & Insights

- Daily Sales by waiter, cashier, or branch.
- Credit Sales Ledger.
- Production vs. Recipe Variance.
- Stock Movement Reports (raw materials & finished goods).
- Wastage Reports with percentage threshold alerts.
- Multi-branch Consolidated Dashboard.

Implementation Details

● Backend: Node.js (Express.js framework)

● Database: MySQL (Hosted on cPanel)

● Frontend: React.js (or Vue.js for lightweight frontend)

● Hosting: cPanel (with Node.js support, Apache/Nginx configuration)

● Security: bcrypt for password hashing, JWT for authentication, HTTPS enforcement

Capabilities

- Amharic & English and **other custom language** support
- Tablet/mobile friendly ordering interface
- Real-time alerts & notifications
- Excel/PDF report export
- Multi-branch scalability
